Profile

Professional Summary

Computer Science Engineer and Software Developer with hands-on experience building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Experienced in developing REST APIs, authentication, database integration, payment workflows, and responsive user interfaces. Also experienced in Python, Django, PostgreSQL, SQL, Docker, and data migration projects. Passionate about building scalable, maintainable applications and continuously improving full-stack development skills.

Professional Experience

MERN Full-Stack Intern, Softroniics — 05/2025 – Present, Calicut

- Assisted in developing responsive web applications using the MERN stack (MongoDB, Express.js, React.js, and Node.js).
- Built reusable and responsive user interface components using React.js.
- Connected applications to MongoDB using Mongoose for data storage and retrieval.
- Performed CRUD (Create, Read, Update, Delete) operations on database records.
- Integrated frontend and backend using Axios and REST APIs.
- Implemented user authentication using JWT

Software Developer, Institute of Human Resources Development (IHRD) — 06/2025 – 02/2026, Trivandrum

- Contributed to the **Kerala Legislative Assembly (KLA) Webcasting Data Migration Project**, focusing on migration, validation, and maintenance of application data.
- Developed and maintained web application features using **Python, Django, React.js, and PostgreSQL**.
- Performed **data migration, data validation, and quality assurance checks** to ensure accuracy and consistency across databases.
- Worked with **PostgreSQL, MySQL, Docker** for database management and application deployment environments.
- Automated and supported **video processing and migration workflows**, including conversion of legacy video files using FFmpeg.
- Collaborated with team members to troubleshoot issues, implement fixes, and maintain reliable project workflows.

Automation Tester, Nucore Software Solutions — 11/2023 – 03/2025, Calicut

- Developed and maintained **automated test scripts** for functional and regression testing.
- Worked with automation tools including **Selenium and Robot Framework**.
- Analysed test results, identified bugs, and documented issues for development teams.
- Collaborated with developers to troubleshoot issues and ensure software quality.

Education

BTech in Computer Science, 06/2019 – 06/2023
Federal Institute of Science and Technology (FISAT) Angamaly
- Bachelor of Technology in Computer Science and Engineering.
- Focused on software development, programming, databases, and computer science fundamentals.

Skills

Programming Languages
JavaScript, Python, SQL, HTML5, CSS3

Backend Development
Node.js, Express.js, Django, REST APIs

Tools & Technologies
Git, GitHub, Docker,Postman, VS Code

Soft Skills
Communication, Teamwork, Problem-Solving, Time Management, Adaptability

Frontend Development
React.js, Bootstrap, Tailwind CSS, Responsive Web Design

Databases
MongoDB, PostgreSQL, MySQL

Testing & Automation
Selenium, Robot Framework, Functional Testing, Regression Testing

Certificates

Full Stack Web Development
Softroniics

Projects

Fragranzia, MERN Stack E-Commerce Application
- Developed a full-stack e-commerce website using React.js, Node.js, Express.js, and MongoDB.
- Implemented authentication, product management, cart, wishlist, orders, and checkout.
- Integrated Razorpay payment processing and order status management

Food Delivery Website, MERN Stack Food Delivery Application
- Developed a full-stack food delivery application using React.js, Node.js, Express.js, and MongoDB.
- Implemented authentication, food listings, cart, orders, and checkout functionality.
- Built RESTful APIs for product and order management.

Todo Management System, MERN Stack
- Developed a full-stack **Todo Management System** using **MongoDB, Express.js, React.js, and Node.js**.
- Implemented **CRUD operations** for creating, updating, deleting, and managing tasks.
- Built RESTful APIs with **Express.js and Node.js** and integrated them with the React frontend using **Axios**.
- Implemented task status management, allowing users to **mark tasks as completed/pending**.
- Designed a responsive and user-friendly interface using **React and CSS/Tailwind CSS**.
- Used **MongoDB** for persistent task storage and structured backend data management
